

## Research and Development Cell Future Strategies

- To create and encourage research culture among teaching faculties. Promoting research quality that contributes meaningfully towards the goal of a self-reliant India and would help to create a research ecosystem for reliable, impactful and sustained research output.
- To organize seminars/conferences/workshops on research topics and training Programme in research methodology.
- To ensure research quality, integrity and ethics.
- To publish quality research papers.
- To encourage collaboration across Industry, Governments, Community based organizations and agencies at the local, National and International levels.
- Research planning, preparing an annual research plan and monitoring research activities.
- Research collaborations with other Institutions.
- Research funding: supporting research proposals for external funding and guiding researchers on how to prepare and submit them.
- Research Information: Developing an Information management system for research projects and ensuring that resources are used appropriately.
- Research Recruitment: Recruiting project staffs and consultants.
- Research Promotion: Promoting research in high priority areas and encouraging inter disciplinary Research
- Research awareness: Raising awareness of the consequences of plagiarism.
- Rising awareness about legal & ethical issues of R&D through workshop etc. These issues include plagiarism, research paper writing, research project writing, patent and data validation etc.
- Registration and updation of research profile at known research platforms such as Google Scholar, Orcid, Vidwan, Research Gate etc. careful monitoring of updation in research profiles is also required.
